PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 3+ years of PHP development experience across freelance and professional roles, specializing in PHP/Laravel and FilamentPHP. Promoted to Software Engineer within 6 months of starting as a fresh graduate after shipping three production-grade systems used by operations teams daily. Strong background in REST API integration, MVC architecture, and Git-based collaborative workflows. Cut annual hosting costs by 72% through full infrastructure migration.

WORK EXPERIENCE

Software Engineer

Casterly Ventures Corp.

July 2025 - July 2026

Pasig City, Philippines

- Promoted to Software Engineer within 6 months for delivering three production systems using PHP/Laravel, FilamentPHP, MySQL and React: a Corporate Website with CMS, an E-commerce Platform, and an Inventory Management System, collaborating directly with the CEO, operations, sales, and warehouse teams to define requirements and iterate based on feedback.
- Delivered a full-stack IMS processing 7,000+ ITAD devices through an 8-stage workflow with role-based access control, applying SOLID principles via reusable Service classes and Traits to reduce duplication, and integrating with 7+ external REST APIs (MIST, Google Drive, PayMongo, TrackingMore) alongside 250+ internal API endpoints.
- Shipped a POS system with barcode scanning, reducing job order release time by 90% across 5,700+ transactions.
- Delivered a real-time Warehouse Management System, replacing a manual Excel-based process for inventory tracking and movement.
- Migrated production from Cloudways to a self-managed Hostinger KVM4 VPS, cutting annual hosting costs by 72% (PHP 40,320 to PHP 11,544/yr) with 4x RAM and 2x CPU.
- Architected CI/CD pipelines via GitHub Actions with zero-downtime deployments and managed Redis jobs and queue infrastructure with 8 workers, reducing deploy time by 70%.
- Optimized frontend performance (asset optimization, lazy loading, caching) and configured Cloudflare Workers for domain-level security, alongside Google Tag Manager product tracking on shop.casterly.ph for conversion analytics.

Backend Developer Intern

Bapplware Technologies, Inc.

February 2025 - April 2025

Mandaluyong City, Philippines

- Delivered 15 RESTful API modules for the HRP-API platform in PHP Symfony within a 3-month Agile sprint cycle, collaborating with senior engineers through code reviews, Trello-based sprint tracking, and daily standups.
- Applied error handling, soft deletes, and data integrity standards across all 15 REST API endpoints with full PHPUnit test coverage to catch regressions before deployment.

Freelance Developer

Self-Employed

June 2020 - January 2025

- Built an Employee Management System for the Philippine Air Force (HSSG) using Java Swing, managing 100+ employee records with role-based access control and reporting.
- Delivered a 12-module Internship Management System for the University of Rizal System as a capstone project using Laravel and FilamentPHP, serving admin, student, and professor users.
- Developed a 10-module seafarer management system for a private client using Laravel and FilamentPHP with facial recognition attendance and real-time application tracking.

PROJECTS

Filament Take Picture Field | PHP, Laravel, FilamentPHP, Composer Package

Open Source Initiative

- Created and maintained an open-source FilamentPHP plugin using the browser's native camera API (JavaScript) to capture images in-browser, with **32 GitHub stars** and **12,000+ downloads**.

- Laravel Scheduled Maintenance | PHP, Laravel, Queue, Composer Package

Open Source Initiative

 - Modernized and maintained an open-source Laravel package for scheduling maintenance windows with support for 3 major Laravel versions (10, 11, and 12).
- MMC MIS (Lead Developer & Project Manager) | Laravel, MySQL, AI

September 2023 - March 2025

 - Led a team of 6 as Project Manager and Lead Developer in building a church Management Information System with a Gemini AI-powered chatbot, automating church administrative operations and winning **Best Software Developmental Study** at the 18th Campus Research Congress.
- BetterBinangonan | Nuxt 4, TypeScript, Vue.js

Active Development

 - Rebuilding an open-source civic website under BetterGov.PH using Nuxt 4, Vue 3, and TypeScript; developed a real-time data import workaround to bypass third-party bot protection blocking runtime API calls, ensuring residents reliably access government project data.
- URSB-ITSL Website | React, TypeScript, Vite

Front-end Development

 - Built and deployed a React, TypeScript, and Vite website for an 800+ member student organization, improving search visibility and site performance.
- GIT.RAWify | JavaScript, Bootstrap

Front-end Development

 - Built a JavaScript developer tool converting GitHub links into raw content URLs, organically generating **86K impressions** and **3.39K clicks**.

SKILLS

Primary Stack: PHP 8.2, Laravel 12, Livewire, Alpine.js, Eloquent ORM, Blade, FilamentPHP v3-4-5, OOP, MVC
Databases: MySQL, MSSQL, PostgreSQL
Frontend: JavaScript, React.js, TypeScript, Vue.js, Nuxt 4, Tailwind CSS, Vite, AJAX
APIs & Integrations: REST APIs, JSON, WebSockets (Laravel Reverb), Google Drive & Merchant API, Google Tag Manager, Google Ads, Gemini AI, TrackingMore API, Blancco/Specy XML Parsing, MIST API, Paymongo API
DevOps & Infrastructure: Linux (Ubuntu), Nginx, Cloudflare (Workers, Pages), CloudPanel, Redis, GitHub Actions, Git
Tools: PHPUnit, Postman, Composer
AI Tools: Claude, Gemini API
Other Languages: Java, VB.Net
Methodologies: Agile (Scrum), Kanban, SDLC

EDUCATION

- University of Rizal System

Binangonan, Rizal

Bachelor of Science in Information Technology

Aug 2022 - Jun 2025

 - Student Organization President (2024-2025) and Vice President (2023-2024) of the URSB BSIT Students' League; Public Information Officer (PIO) of the URSB Graduating Class 2025.
